### DETAILED ACTION

Receipt is acknowledged of applicants Request for Continued Examination filed on January 16, 2003.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,406,715. Although the conflicting claims are not identical, they are not patentably

Art Unit: 1615

distinct from each other. U.S. Patent No. 6,406,715 claims an intermediate release formulation in the form of tablet suitable for oral administration once-a-day as a single dose for treating hyperlipidemia without causing drug-induced hepatotoxicity to levels which would requires the discontinued used of the formulation comprising nicotinic acid in amounts of 2500 mg, 2000 mg, 1000 mg, 750 mg and 500 mg. The instant claims are also drawn to an intermediate release formulation in the form of tablet suitable for oral administration once-a-day as a single dose for treating hyperlipidemia without causing drug-induced hepatotoxicity to levels which would requires the discontinued used of the formulation comprising nicotinic acid in amounts 1000 mg, 750 mg, 500 mg and 375 mg. The difference between the instant claims and U.S. Patent No. 6,406,715 is the instant claims also add  $C_{max}$  and  $T_{max}$  limitations to define the formulation. These limitations are obvious to one of ordinary skill in the art to vary in formulations to maximize the effectiveness of the formulation. The formulations will have the same  $C_{max}$  and  $T_{max}$  characteristics when the same active agents and additional components are used in the same concentrations. Therefore, the instant claims are rendered obvious over U.S. Patent No. 6,406,715.
